

GOPAL KRISHNA PAIDI

Senior Software Engineer

Aurora, IL 60504 | +1 630 360 3031 | gopal.1987@gmail.com

LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Senior Data Engineer with 15+ years of experience designing and building scalable data platforms across cloud environments. Expertise in architecting real-time and batch data pipelines using Azure Databricks, Spark, and event-driven architectures. Proven track record of delivering high-impact data solutions in retail and financial services, including ML feature engineering platforms and enterprise data integration systems. Google Cloud Professional Data Engineer certified with hands-on experience across Azure and GCP ecosystems.

TECHNICAL SKILLS

Programming Languages: Python, PySpark, SQL, C#, Java

Cloud Platforms: Azure, Google Cloud Platform (GCP)

Frameworks & Tools: Azure Databricks, Azure Data Factory, Azure Functions, Azure Event Hubs, Apache Spark, Spark Structured Streaming, Apache Airflow, Flask, NATS, Apigee, Azure DevOps

Databases: SQL Server, NoSQL (MongoDB), Teradata, Hive

PROFESSIONAL EXPERIENCE

Senior Engineer

Starbucks Coffee Company | Aurora, IL | Jan 2024 - Present

- Architect and develop scalable data integration solutions leveraging Azure cloud services, including Databricks, Function Apps, and Event Hubs
- Design and implement real-time event-driven data pipelines using Azure Event Hubs and Spark Structured Streaming to enable near real-time data processing
- Develop serverless Azure Function Apps to orchestrate event-triggered workflows and data transformations
- Integrate secured REST API endpoints through Apigee Gateway, ensuring secure and standardized access to enterprise services
- Lead the revamp of the existing data pipeline orchestration service, improving maintainability and operational efficiency
- Collaborate with cross-functional teams to design end-to-end data solutions that support business intelligence and analytics initiatives
- Mentor team members on best practices for cloud-native development and data engineering patterns
- Conduct design reviews and contribute to architectural decisions for new data platforms and services

Senior Data Engineer

Starbucks Coffee Company (via VistaPro, SIARP) | Aurora, IL | Dec 2022 - Dec 2023

- Designed and developed scalable and efficient data pipelines using Spark and Python, ensuring extraction, transformation, and loading (ETL) of large volumes of data
- Collaborated with cross-functional teams to understand data requirements and translate them into technical solutions
- Implemented and maintained data processing workflows in Databricks, leveraging its powerful features for data exploration, analysis, and visualization
- Utilized Azure Cloud services to design and build robust and secure data infrastructure, including data storage, data lakes, and databases
- Ensured data quality, accuracy, and consistency by implementing data cleansing, validation, and enrichment processes
- Optimized data processing and query performance through performance tuning, indexing strategies, and data partitioning techniques

Senior Data Engineer

ABN AMRO Bank (via A2Z-CM) | Amsterdam, Netherlands | Feb 2022 - Nov 2022

- Developed efficient feature logic and generated feature datasets for several machine learning models
- Extensively used Azure Databricks and Azure Data Factory to operationalize feature pipelines and build ML models
- Migrated existing/legacy feature code to use new Feature Store API and build features in an optimized way
- Collaborated with Data Scientists and ML Engineers to operationalize ML pipelines

Senior Software Engineer

Wells Fargo | Hyderabad, India | Apr 2016 - Jan 2022

Customer Engagement Engine (CEE)

- Generated features requested by Data Science team using Apache Spark (PySpark & SQL) for AI-powered customer engagement platform
- Built framework to operationalize feature engineering jobs in production with ability to run/schedule Spark jobs in IBM Spectrum
- Executed end-to-end Pilot on GCP, from ingress of masked data to GCS to running feature engineering jobs on GKE cluster
- Involved in design and development of Global Feature Store; developed APIs to validate features and identify drift using statistical analysis

AI Automation

- Developed Flask-based micro service framework to create RESTful APIs for ML automation tasks
- Built Post Ingestion Data Validation Framework providing detailed validation report comparing Source (Teradata) to Target (Hive)
- Developed Airflow DAGs to schedule Feature Engineering jobs with task dependencies

Kraken Muni - Municipal Bond Trading System

- Worked in Analytics team to understand patterns in traders' bid history; compared bids with MSRB prices to derive best price
- Collaborated on Muni Data Strategy project built on Apache Ignite enabling standard SQL queries on real-time data
- Solely developed 'Athena' Dashboard, Risk Viewer and several other UI components for trading applications

BA4 (Business Analyst)

Barclays Technology Center India | Pune, India | May 2013 - Mar 2016

- Developed Report Administration and Management Portal (RAMP), an integrated multi-asset class tool for client reporting functions
- Built MI Direct tool to automate PnL delivery process by capturing Product Control reports with metadata in controlled repository

Software Developer

Thomson Reuters | Hyderabad, India | Apr 2011 - Apr 2013

- Worked as part of SMART practice aids team to automate significant audit processes using modules for Risk Assessment, Internal Control, Disclosure, IFRS Disclosure, Single Audit and Field Work
- Involved in migrating Windows Forms application to WPF; designed and developed UI screens, user-controls and custom controls

Project Engineer

Wipro Technologies | Hyderabad, India | Dec 2008 - Mar 2011

- Developed and maintained web applications using C#, ASP.NET, and other Microsoft technologies
- Collaborated with the team to build scalable, high-performance applications; wrote and optimized SQL queries
- Participated in all stages of SDLC, including requirement analysis, design, coding, testing, deployment, and maintenance

EDUCATION

Bachelor of Technology: Biotechnology

Andhra University | Visakhapatnam, India | Aug 2004 - May 2008

CERTIFICATIONS

2021 - Certified Professional Data Engineer, Google Cloud

2018 - Advanced Certification in AIML, IIIT Hyderabad

2017 - Investment Foundations, CFA Institute

2009 - Sun Certified Java Programmer 1.5
