

Gopal Krishna Paidi

Senior Software Engineer

Enthusiastic Data Engineer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Excellent reputation for resolving problems and improving customer satisfaction. Motivated to learn, grow and excel.

Work History

2024-01 - Current	Senior Engineer <i>STARBUCKS COFFEE COMPANY, Aurora, IL</i> - Develop and design scalable applications on Spark/Databricks. - Collaborate with development team, other Information Technology (IT) teams' developer leads. - Initiate process improvements for new and existing systems. - Design, develop, implement, document, and test changes to application subsystem. - Create prototypes and ensure deliverables are high quality and meet user expectations. - Support system and integration testing activities. - Perform root cause analysis to identify permanent resolutions to software or business process issues. - Initiate design reviews for new applications and adhere to software development standards. - Coach, and mentor other team members. - Perform cross-functional training and facilitate information sharing among team members.
2022-12 - 2023-12	Senior Data Engineer <i>STARBUCKS COFFEE COMPANY (via VistaPro, SIARP), Aurora, IL</i> - Design and develop scalable and efficient data pipelines using Spark and Python, ensuring extraction, transformation, and loading (ETL) of large volumes of data. - Collaborate with cross-functional teams to

Skills

- Programming**
Languages: Python, PySpark , SQL, C#, Java
- Cloud Platforms:** Azure, GCP
- Frameworks & Tools:**
Azure Databricks, Azure Data Factory, Apache Spark, Apache Airflow, Flask, NATS, Azure DevOps
- Databases:** SQL Server, NoSQL (MongoDB), Teradata, Hive

Languages

English	●●●●● Advanced
Hindi	●●●●●

understand data requirements and translate them into technical solutions.

- Implement and maintain data processing workflows in Databricks, leveraging its powerful features for data exploration, analysis, and visualization.
- Utilize Azure Cloud services to design and build robust and secure data infrastructure, including data storage, data lakes, and databases.
- Collaborate with data scientists, analysts, and other stakeholders to understand their data needs and deliver high-quality data assets.
- Ensure data quality, accuracy, and consistency by implementing data cleansing, validation, and enrichment processes.
- Optimize data processing and query performance through performance tuning, indexing strategies, and data partitioning techniques.
- Collaborate within Agile development environment, participating in sprint planning, backlog grooming, and regular stand-up meetings.

2022-02 -
2022-11

Senior Data Engineer

ABN AMRO Bank (via A2Z-CM), Amsterdam, Netherlands

- Primarily involved in developing efficient feature logic and generate feature dataset for several machine learning models.
- Extensively used Azure Databricks and Azure Data Factory to operationalize feature pipelines and build ML models.
- Migrated existing/legacy feature code to use new Feature Store API and build features in optimized way.
- Collaborate with Data Scientists and ML engineers to operationalize ML pipelines.

2016-04 -
2022-01

Senior Software Engineer

Wells Fargo, Hyderabad, Telangana

Customer Engagement Engine (CEE):

The Customer Engagement Engine is an AI-powered brain that decides the 'next best conversation' to have with a customer based on customer behaviors,

Telugu

Good

available product & service offers and sophisticated machine learning and adaptive modeling principles.

- Responsible in generating features requested by Data Science team using Apache Spark (PySpark & SQL)
- Built framework to operationalize feature engineering jobs in production. This provides ability to run/schedule Spark jobs in IBM Spectrum.
- Executed e2e Pilot on GCP. Right from ingress of masked data to GCS to running feature engineering (spark) jobs on GKE cluster.
- Involved in design and development of Global Feature Store.
- Developed APIs to validate features and identify drift using statistical analysis.

AI Automation:

AIML Automation involves development of APIs to automate tasks -

- Developed Flask based micro service framework to create Restful APIs.
- Built Post Ingestion Data Validation Framework which provides detailed validation report comparing Source (teradata) to Target (Hive).
- Developed Airflow DAGs to schedule Feature Engineering jobs with task dependencies.

Kraken Muni:

Kraken Muni is a front office municipal bond trading system used by traders. This consists of a suit of trading apps which help in BUY, SELL and analyze risk (Pnl, DV01/Pos DV01)

- Worked in Analytics team to understand patterns in Traders bid history. Compared Bids with MSRB prices to derive best price.
- Collaborated in Muni Data Strategy project - this is developed on Apache Ignite which enables users to write standard SQL queries on real time data.
- Extensively worked on trading apps like Trader Desktop, Market Data Blotter.
- Solely developed 'Athena' Dashboard, Risk Viewer and several other UI components.

2013-05 -
2016-03

BA4

Barclays Technology Center India, Pune, Maharashtra

Report Administration and Management Portal (RAMP):

- RAMP provides integrated, multi-asset class tool for all client reporting related functions and replaces platform Prime Customized Reports(PCR). RAMP provides one-stop-shop for business and operations users for subscribing, creating, maintaining and monitoring client and internal reporting.

MI Direct:

- Management Information(MI) Direct tool automates whole process of Pnl delivery by capturing Product Control reports (along with metadata) being distributed. All reports will be saved in controlled repository providing ease of access for Product controllers.

2011-04 -
2013-04

Software Developer

Thomson Reuters, Hyderabad, Telangana

- Worked as part of SMART practice aids team to automate significant audit processes using modules for Risk Assessment, Internal Control, Disclosure, IFRS Disclosure, Single Audit and Field Work to optimize auditor judgments, increase audit effectiveness, and increase consistency across audit engagements.
- Involved in migrating Windows Forms application to WPF. Designed and developed UI screens, user-controls and custom controls

2008-12 -
2011-03

Project Engineer

Wipro Technologies, Hyderabad, Telangana

- Develop and maintain web applications using C#, ASP.NET, and other Microsoft technologies.
- Collaborate with the team to build scalable, high-performance applications.
- Write and optimize SQL queries and work with SQL Server databases.
- Utilize LINQ for data manipulation and querying within applications.
- Participate in all stages of the Software Development Life Cycle (SDLC), including requirement analysis, design, coding, testing,

deployment, and maintenance.

Education

2004-08 - 2008-05	Bachelor of Technology: Biotechnology <i>Andhra University - Visakhapatnam</i>
------------------------------	--

Certifications

2021-01	Certified Professional Data Engineer, Google Cloud
2018-10	Advanced Certification in AIML, IIIT Hyderabad
2017-12	Investment Foundations, CFA Institute
2009-06	Sun Certified Java Programmer 1.5
